OGS

OCEANIA GAS SAFETY

GAS SAFETY IN EVERY ENVIRONMENT.

**The leading designer, manufacturer and supplier of
the latest range of gas safety products.**

Ranges include; gas ventilation and gas interlock systems for use in commercial kitchens, gas pressure proving systems and gas detection systems for school laboratories and boiler houses.
Designed and manufactured in the UK.

38 Years Industry Experience

Easy to Install Solutions

3 Year Product Warranty

Product key features

The benefits of each of our products are illustrated in an icon format throughout this brochure, aiding you to select the product and design features most suited for your requirements.

The icons are located at the top of each product page with accompanying detail for ease of reference and comparison of the solutions we have available.

If you have any questions about any products and their features please contact info@oceaniagassafety.com.

Kitchens

OGS have a range of gas interlock and environmental monitors to meet all of the latest gas and ventilation regulations for commercial kitchens. We have industry leading range of products, from a simple gas interlock system to our advanced demand controlled kitchen ventilation systems and environmental monitors.

Merlin 3000S System

ENERGY SAVING DEMAND CONTROLLED VENTILATION SYSTEM

The Merlin 3000S energy saving system is a combined demand controlled ventilation system with built in gas interlock and optional gas proving.

The 3000S system automatically adjusts the speed of the ventilation based on the kitchen environment.

The ventilation is automatically controlled based on the carbon dioxide levels, smoke/steam present in the canopy, carbon monoxide, real time gas usage and temperature.

This system can offer large financial savings and short payback periods for any commercial kitchen.

Additional features

Saves energy by varying the ventilation speed via 0-10v DC output. This reduces manual ventilation control.

The Merlin CT1750 System is a gas interlock and manual ventilation control system designed for commercial kitchens. The Merlin CT1750 System comes with two variable fan speed controllers (0-10V output) to control the speed of 2 fans via an inverter.

The Merlin CT1750 System works with carbon dioxide monitors and carbon monoxide detectors to increase the speed of the ventilation when these gases are present, both in and out of working hours.

*Please note before ordering the ventilation system / inverter must accept a 0-10v DC control signal.

Commonly used in kitchens with solid fuel appliances.

Additional features

Can control the ventilation via 0-10V output.

*Transmitter supplied separately

SOLID FUEL GAS SAFETY SYSTEM

Merlin CT1650+ System

Monitor up to four fans

Built in LCD current monitors

INTELLIGENT CURRENT MONITORING INTERLOCK SYSTEM

The Merlin CT1650+ System is a current monitoring interlock system for commercial kitchens. This comes with two built in intelligent current monitors.

The Merlin 1650+ has the facility to interlock with two additional fans via remote current monitors PM2+ / CS1-2) or air pressure differential switches. The 1650+ is commonly used with a carbon dioxide monitor.

Additional features

- Intelligent Current Monitors to set "high" and "low" parameters.
- Current Monitors parameters 0.2amp to 20amp.
- Adjustable sensitivity threshold to reduce nuisance drop outs.
- Fan start stop output (12v output when on).

The Merlin 2000X is a ventilation interlock and gas proving system for commercial kitchens and includes two built in intelligent current monitors.

The Merlin 2000X comes with a gas pressure transmitter included for commercial kitchens where gas appliances don't have flame failure devices. The Merlin 2000X System works with external current monitors or air pressure differential switches, the system can also interface with various gas detectors.

Additional features

- Intelligent Current Monitors to set "high" and "low" parameters.
- Current Monitors parameters 0.2amp to 20amp.
- Adjustable sensitivity threshold to reduce nuisance drop outs.
- Fan start stop output (12v output when on).
- Facility to interlock using external current switches or air pressure differential switches (4 fans)
- Works with gas detectors and Carbon monoxide monitors

Boiler Room

OGS have a solution for every commercial Plant room application. We offer a wide range of control panels, gas detectors, heat sensors and gas solenoid valves. Whether your project is a small residential application or a large scale plant room we have the knowledge and experience to offer the perfect products. Remote monitoring, Modbus and data logging are available on our GDPX Range.

GAS PROVING
& DETECTION
WITH REMOTE
MONITORING
(16 ZONE)

The Merlin GDPX+ is a multi-zone gas detection panel which can be used in many applications such as boiler house/ Plant rooms, factories, car parks and high rise. It can be used with up to 16 Merlin gas detectors for monitoring and detecting gas including carbon monoxide, LPG, Natural Gas, Oxygen and Hydrogen.

The GDPX+ can be remotely monitored from www.snsnorthern.com so you can monitor the status of your sites from your computer or smartphone.

Additional features

- Internet enabled (LAN)
- Remote monitoring LAN connection using snsnorthern.com portal
- Can be used with up to 16 gas detectors
- Connections for heat detectors/thermal links
- Two spare Input Connections (for additional detectors, fans, equipment)

*Gas pressure transmitter included

OFTEN USED WITH

GAS PROVING & DETECTION (2 ZONE)

The Merlin 1000BH is a gas pressure proving and gas detection panel for use in plant rooms and boiler houses. This panel is to be used to carry out a gas proving test on the pipe work in order to highlight if there is a gas appliance open or a gas leak. The Merlin 1000BH is designed to give the user full control over the incoming gas supply with the lockable keyswitch operation.

- Additional features**
- Gas valve output
 - Can be used with two gas detectors

UTILITY ISOLATION PANEL

The Merlin panel is designed to provide the user with an effective means of isolating the utility, via a key switch or in the event of an emergency, by operation of the emergency shut off button. The 500S has a fascia mounted emergency shut off button fitted as standard and the fascia mounted LEDs give simple and concise information to the operator. The panel is fully compatible with S&S Northern remote emergency stop terminals allowing a large number of emergency terminals to be connected in series and wired back to the panel.

Additional features

- Easy installation
- Covered by **OGS** 3 year warranty

Detectors

OGS manufacture a wide range of gas detectors for monitoring air quality, toxic gases, explosive and flammable gases. They are designed to be easy to install and maintained. Each target gas has unique characteristics and therefore the detector needs to be installed to suit the target gas, please contact us or have a look on our website for mounting height information and advice on installation.

**SIMPLE,
EFFICIENT &
RELIABLE**

Carbon Dioxide and temperature monitor

- ✓ Dual power 230V AC or 12-24V AC/DC
- ✓ Modern design with a slim and compact enclosure

1. CO2 Levels

Displays current c02 gas levels in parts per million (ppm).

2. Average CO2 Levels

Average c02 readings over an 8 hour period when above 600ppm.

3. Gas in use

Indication when the gas is being used.

4. Traffic light indicator

Display changes colour dependent on the c02 levels and temperature. Green-Safe, Yellow-Attention, Red-Danger.

5. Temperature reading

Displays temperature levels over 30 minuet periods.

6. Touch button

Used to activate 'Boost' or 'Mute'.

7. Boost on

Analogue outputs will run at optimum voltage (10V) to run a fan.

8. Mute

Sounder alarm mute indication.

9. Easy installation

Engineers settings menus for easy navigation

10. 0-10V Outputs

0-10V analogue outputs progress bars

CO2-X Monitor

Clear digital display

Designed specifically for BB101

Automatic alarm

12V DC, 24VDC or 230V AC powered.

Fan controller enabled relay output

CARBON DIOXIDE MONITOR

The CO2-X is a dual powered carbon dioxide and temperature monitor, which has the ability to show average readings over an 8 hour period.

Additional features

- Can automatically change alarm settings based on gas valve activation
- CO2 and temperature levels measured and displayed clearly.

- 2 x 0-10V Signal output.
- Displays average readings of CO2 concentration over an 8 hour period.
- End of life and fault notifications.
- Pre alarm and alarm output.
- Variable CO2 and temperature output

The budget friendly Merlin CO2-C1 detector is a mains powered monitor to give the end user simplified analysis of the carbon dioxide levels in the surrounding area. The Merlin CO2-C1 has a traffic light colour system (red, amber, green) with high, medium, low indications.

Additional features

- Traffic light display to clearly indicate low, medium and high levels of CO2.
- Low voltage switch when levels of carbon dioxide increase
- Mains powered

Gas Detectors

The S&S range of gas detectors are used in various applications such as boiler/plant rooms, hospitals, laboratories and high rise buildings.

- ✓ Modern design with a slim and compact enclosure
- ✓ No calibration required - pre-calibrated in the factory
- ✓ Power supply 12-24V AC/DC
- ✓ Various outputs to work with control panels
- ✓ Connections available for Modbus outputs

1. End of life indicator

To alert the user that the detector has reached its expected operational lifecycle.

2. Traffic light indicator

To summarise gas levels: display changes colour dependent on live gas levels. Green-Safe, Yellow-Attention, Red-Danger.

3. Multiple detector chains

Individually identify each detector and the monitoring zone the detector is located.

4. Gas levels

Displays current gas levels in parts per million (ppm) or low explosion level (LEL) dependent on the gas detector type. Levels visible at all time.

5. Service & Maintenance

A service screen will intermittently flash every 30 seconds after one year of service.

Mini Merlin CH4CO TFT

Clear digital display

Gas Level Indicator for both NG and CO

COMBINED
NATURAL GAS
& CARBON
MONOXIDE
DETECTOR

The Mini Merlin CH4CO TFT for domestic applications.

The Mini Merlin CH4CO TFT is a dual gas sensor carefully designed and tested to monitor levels of natural gas-Methane (NG) and Carbon Monoxide (CO) in the air. If there is a dangerous build-up of gas or unsafe levels of carbon monoxide at the sensor, this device can shut off the gas supply via a gas safety valve.

Additional features

- Dual sensor built into one controller
- End of life notification
- Shuts off gas when in high alarm
- Low voltage input to connect with emergency stops and fire alarms.

FAB-1 Fire Alarm bypass

Merlin
GDP-2
Page 33

Merlin
1000BH
Page 32

OFTEN
USED
WITH

The Merlin FAB1 can be integrated with any of the Merlin suite of products to give the operator the opportunity to temporarily bypass the gas isolation system. With prior notice to a fire alarm test, the operator can turn the key to the on position giving an uninterrupted gas supply for between 10 and 45 minutes.

During this time the system controlling the gas will ignore shut-off signals from the buildings fire alarm system and allow factors such as heating systems to remain operational. The bypass time can be adjusted using the blue switches inside the panel. During the bypass time gas can still be shut off, pressing the emergency gas shut off button will close the gas solenoid valve.

The Sounder Alarm Beacon is a remote alarm beacon most commonly used outside a boiler room. This sounder alarm beacon can give both an audible and visual alarm in the event of an emergency. Various colours are available to suit the application.

Air Pressure Differential Switch

An air pressure differential switch is a mechanical switch fitted in ductwork which can be used to monitor and check airflow rates. These switches are adjustable and have a range from 20-300PA, they also come with a 1m duct kit to be fitted into the ductwork and detect the airflow.

Water Solenoid Valve

Page 25

Our water solenoid valves are most commonly found in science laboratories where the teachers want full control of the water supply to the benches, but they can be used in a range of applications.

Similar to a gas solenoid valve, our water solenoid valves are normally closed, auto-reset and 230V so they can be controlled by the Merlin gas safety systems.

Once again, we have a full range of sizes available, WRAS approved and can offer specialist types on request.

Our gas solenoid valves are 230V powered, normally closed, auto-reset and will most commonly be powered from our Merlin gas safety systems. In the event of an emergency, the Merlin gas safety system will take power away from the gas solenoid valve causing it to slam shut, and when power is re-instated this will then allow gas to flow through the pipework.

We have a full range of sizes available, both screwed and flanged, and can offer specialist gas valves on request.

The DPM-2 is a dual pressure monitor which enables connection of two gas solenoid valves and two pressure sensors to any Merlin gas proving panels.

CS1/CS2

The Merlin CS1 & CS2 Current Switch is to be used in conjunction with the Merlin range of ventilation interlock systems and can be used as an alternative to air pressure differential switches.

The Merlin PM2+ Current Monitor is a dual fan current monitor and is to be used in conjunction with the Merlin systems: the unit can be used as an alternative to an air pressure differential switch.

Page 10

Optical Sensor

The Optical Sensor emits a beam across the kitchen canopy, if the beam is interrupted by excess smoke/steam it will send a signal back to the control panel.

Duct Thermostat

Merlin
3000S
Page 10

OFTEN
USED
WITH

The Duct Thermostat provides a control signal back to the Merlin control panel depending on the temperature in the duct work.

As the duct temperature becomes too hot the Merlin control system can increase ventilation.

Speed Controller

We stock a full range Electronic fan speed controllers. This range of fan speed controllers can be used with most Fans / Motors which is single phase - 240 volts and fan speed controllable using either 2 or 3 wire control.

Inverter

We can offer a range of single phase and three phase inverters. These can be used with our control panels such as the Merlin 1750 and Merlin 3000S. They offer an efficient method of controlling fan motors.

TBX Gas Meter

The TBX gas meter is a precise way of monitoring the amount of gas being used in any application. The TBX provides a pulsed output which can be interpreted by our merlin control units or a BMS system.
