

ALL CONTROLS

Residential Catalogue 1.2

About us

All Controls was established in 1969 as a Wholesale and Importing Company by the Anderson Family looking after the WA market.

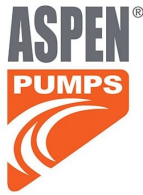

In its early years, our main business was the sale of elements and thermostats to local hot water system manufacturers in the Perth Region. In the early eighties the Dampier to Bunbury natural gas pipeline was installed. This opened a whole new market for All Controls. All Controls became the sole distributor for Siemens Combustion Products in WA, making us a major supplier of Commercial & Industrial gas controls to the WA market. In 2021 All Controls went National and set up an Office/Warehouse facility in Victoria plus Sales Offices in QLD and SA. We set up an Office/Warehouse in Auckland New Zealand in the same year giving us an Australasian presence.

All Controls has now become a major supplier of Gas Combustion Equipment, Thermostats & Elements to the Australasian market. We now represent major Global Brands like Pietro Fiorentini, Honeywell, Kromschroder, OGS, Testo, Resideo and Riello. All Controls also sell after-market gas and electrical products that go into units for famous brands like Rheem, Dux, Rinnai, and Raypak in Hot Water and Bravis, Braemar and Bonaire in Evaporative Cooling and Heating Units.

Of recent times, All Controls has also become a distributor of a wide range of Refrigeration & HVAC parts and cleaning products which it distributes through the wholesalers. We sell famous brands like Mastercool and Viper Supercool products.

We have still remained a proud family business based on good business values of fair pricing, excellent stock availability and strong technical support.

PART NUMBER	DESCRIPTION	UNIT	QTY
PWF30	BRAEMAR WALL FURNACE 30MJ POWERFLUE	EA	1
PWF40	BRAEMAR WALL FURNACE 40MJ POWERFLUE	EA	1
SY077956	PWF30/40 FLUE KIT - TO SUIT ANY INSTALLATION	EA	1

INFO:

Ideal for heating the living area or entertainment spaces of your home, the Braemar Ecostar Power Flue Wall Furnace (PWF) delivers comfort and warmth throughout the cooler months. A great replacement for existing wall furnaces, with an energy efficiency of up to 4.5 stars.

The PWF utilises a powered flue system – safely expelling combustion emissions outside, leaving you in cosy warm comfort inside.

Replaces the following units:

- Braemar D11/D12/D45/D55
- Vulcan Series 20/22/Quasar
- IXL 10862
- Convair Finesse Range

L66	950	800	400	1100	57	130
L76	1000	800	400	1100	57	130

The sleek Brivis Contour evaporative cooler is one of the most advanced Evaporative Coolers in its class, by delivering volumes of refreshing cool air without the large profile of traditional coolers. Designed to consistently deliver clean air, the system's pre-wet cycle allows for fresh water to enter the cooler and begin soaking the cooling pads before the fan starts. This in addition to other features including robust UV protected plastic construction, quiet operation and efficient water management provides you with peace of mind and comfort all summer long.

Contemporary in design, the Brivis Advance/Brivis Advance Plus Evaporative Cooling Series features a sloping trough which keeps the water constantly circulating through the system. Its greater cooling pad surface area, excels in providing large cool airflow requirements within the home. This combined with variable fan speed settings, makes the Advance Series the ultimate in providing comfort suited to your needs. Encased in a tough plastic exterior, the Evaporative Cooler has efficient water management, quiet drive fan and a high capacity to keep you cool and comfortable when you need it most.

MOPEKA PRO CHECK UNIVERSAL

STEEL TANKS - LPG, DIESEL, OIL, WATER - UP TO 550KG

PART NUMBER	DESCRIPTION	UNIT	QTY
MP1017023	PRO CHECK UNIVERSAL LPG, DIESEL, OIL, WATER 550KG	EA	1

The Mopeka Pro Check Universal Sensor is the next generation of our powerful Pro Check Technology and gives users the same great usability and connectivity, but adds significantly new and beneficial features:

- **Enhanced accuracy** – the Pro Check already has a 99% level of accuracy... the Pro Check Universal will further extend this accuracy to 99.5%
- **Additional commodities** – the Tank Check App that accompanies the Pro Check Universal will add additional commodities to the drop down list including Diesel, Oil, Water, Propane, Butane, Anhydrous and other liquid commodities

63% increase in battery life of the sensor over the original Pro Check

Using powerful magnets to attach to the base of the cylinder, spacers and dielectric grease.

Elevate your outdoor cooking and propane-powered patio heater experience with our advanced digital propane tank gauge. The Pro Check Universal is an indispensable tool for every outdoor enthusiast, providing real-time updates on your propane level through a seamless mobile app connection. In addition, the sensor can also be used to measure other liquid commodities including Oil, Diesel and Water.

Effortless Installation - Say goodbye to complicated setups. Our tank sensor easily attaches to the underside of your tank with powerful magnets or mounting collars, and can be secured in seconds. No matter the terrain, our sturdy magnets and mounting collars ensure the sensor stays firmly in place on your RV's propane tanks, giving you peace of mind during your travels. It's designed to fit tanks sizes of up to 250gallons.

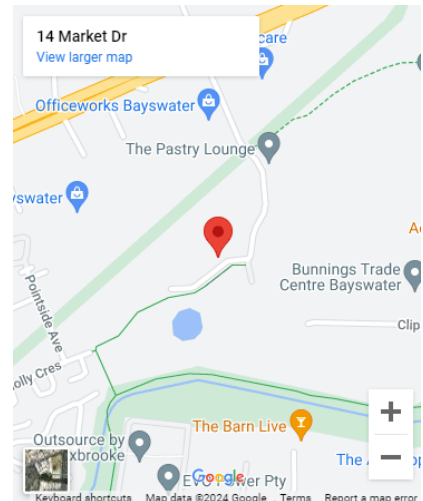

Extended Battery Life - Our tank sensor now boasts a significantly longer-lasting battery, ensuring it remains operational for extended periods without needing to be replaced. When needed, the battery is replaceable.

Cutting-Edge Technology - The Pro Check Universal comes with integrated temperature sensing, a tank "bubble level" indicator, configurable sample timing, firmware updates, and customizable alarms/alerts, all designed to enhance reading quality and precision. It works seamlessly with both vertical and horizontal cylinders, making it a ver-
